FRONT-END DEVELOPER

I am a Front-End Developer with a strong track record in creating responsive landing pages, scalable website, and interactive user interfaces. I excel in both independent and collaborative projects, consistently delivering high-quality results, focused on performance and usability. My proactive mindset and strong problem-solving skills consistently drive excellence across both web and mobile platforms.

STRENGHTS AND EXPERTISE

Programming Languages: JavaScript, TypeScript

Frameworks and Libraries: ReactJS, Redux, React-Native, NextJS, ElectronJS, Styled-component, Tailwind CSS, SCSS

Technology: HTML, CSS, GraphQL (Apollo client), React-query

Databases: MongoDB, Firebase, Supabase

Testing: Jest, React Testing Library, React-native testing Library

CI / CD: Github Action

Other Skills: Cross-Browser Compatibility, User interface Design, Pixel-Perfect Front-End Code, Team Collaboration, Agile/Lean Development, Bug Fixing, SEO, Communication, UI/UX Assessment

PROFESSIONAL EXPERIENCE

CampusEase – Founder & Fullstack Developer

Dec 2024 – Present

CampusEase is a web application designed to make campus life easier for students, helping them find accommodation, services, properties, and roommates.

- Built the entire stack using Next.js, TypeScript, Tailwind CSS, MongoDB, and Cloudinary.
- Implemented authentication, listings, filtering, and profile management using Next.js API routes.
- Designed and deployed a scalable, responsive UI and backend, ensuring performance across devices.
- Led the product vision, roadmap, and development as sole developer and founder.
- Ensured high code maintainability and usability, demonstrating fullstack proficiency.

Bahojutech – Front-end Developer (Hybrid)

Nov 2024 – Apr 2025

Bahojutech was a digital solutions company specializing in web/mobile development and branding (company later closed).

- Sole front-end developer, taking ownership of all client-facing UIs.
- Built admin dashboard for a ride-hailing application.
- Developed a responsive e-commerce interface collaborating with backend and design teams.
- Supported digital marketing campaigns and applied SEO best practices to improve online visibility.

Paatee – Contracted Front-end Developer (Remote)

Aug 2024 – Jan 2025

- Contracted to develop the front-end of a vendor marketplace app (project not launched).
- Built interactive, responsive features using Next.js 14, GraphQL (Apollo Client), and Tailwind CSS.
- Implemented GraphQL queries and mutations to manage vendor and event data efficiently.
- Ensured seamless UI/UX integration in collaboration with the design lead and backend.
- Focused on performance optimization and responsive design, delivering a smooth user interface.

Ciniki – Contracted Mobile Developer (Remote)

Jun 2024 – Sep 2024

Ciniki is a mobile currency exchange product designed to offer real-time conversion and secure transactions.

- Developed a cross-platform React Native app with real-time currency conversion.
- Implemented secure authentication across Android and iOS.
- Collaborated directly with the client to refine features and updates.
- Delivered a smooth, responsive user experience for both mobile platforms.

Exagorazotechhub – Frontend Mentor (Onsite)

Jan 2024 – May 2024

Exagorazo is a tech institution offering courses in frontend/backend development, UI/UX design, and data analysis.

- Mentored students in HTML, CSS, JavaScript, and React, resulting in strong course completion rates.
- Designed project-based curriculum to enhance engagement and learning outcomes.
- Developed tutorials, coding exercises, and project guides to simplify complex concepts.
- Encouraged collaboration through group projects and code reviews, boosting student confidence and skills.

BSc in Computer Science, Ebonyi State University
